

PRESS RELEASE - - - Scottsboro, Alabama, July 01, 2007

Innovative Signals Technology (ISigTech) announces the release of **KODIAK** – a robust signal processing, analysis and data management application for Tactical SIGINT. KODIAK is the inaugural back-end component of ISigTech's revolutionary **KODIAK Tactical Intelligence Suite**.

KODIAK provides a common, comprehensive architecture and simple to use application for analysts, operators, linguists and decision makers to perform tactical intelligence missions. The application enables simultaneous real-time and offline processing. KODIAK also enables customers to develop or merge in existing signal and analysis capabilities as needed.

About Innovative Signals Technology:

Innovative Signals Technology, LLC (ISigTech) designs and develops state-of-the-art software and hardware products for the Signals Intelligence (SIGINT) market. ISigTech is comprised of engineering and business professionals dedicated to revolutionizing tactical SIGINT production. We are technical and operational experts in the areas of data acquisition, signal processing, signals analysis, and information assurance.
